

Bannock County Sheriff's Search & Rescue

Mission Statement

The mission of Bannock County Sheriff Search and Rescue is to provide vital emergency search and rescue services to those in need and support local and regional professionals in emergency response. We are dedicated to locating and rescuing missing people and providing safety education in the Bannock County area.

Goals:

- 1 Provide the most professional and effective response to urban and wilderness search and rescue incidents.
- 2 Responders return to their lives, families and jobs safely.
- 3 Find and assist victims back to their normal life with no further injury.
- 4 Ensure a quick, safe response to the call with a clear understanding of the mission.
- 5 Ensure the safety of fellow responders.

Impact

We as a unit at this time do not have a facility to help rehabilitate those who have been stranded out in the back country areas, Members of our team who have been trying to assist in searches, or incidents that last an extended period of time. In completing this project we will be able to facilitate those needs as well as give us a great place of operation. It is my belief that this project will positively impact all of the citizens we serve in Bannock County.

Our Goal

I still need to try and finish the interior of our command trailer. We are in need of a refrigerator, microwave, chair for the desk, a television, computer monitor, and a printer etc. The cost of building a desk, shelving units, and bench seating is \$2500.00. The cost of installing radio equipment so that we may have the communication capability in this trailer is \$1,700. We also will have the installation costs for the equipment listed above. Estimated cost of this project was \$5000.00 or more. Any money raised for this cause will be utilized for equipment purchases and continued maintenance. With all of the summertime

activities upon us we are going to see an increased potential use of this trailer, and equipment. My goal is to have this completed as soon as possible because the sooner that we can get this equipment into service the sooner we've accomplished serving our community in a greater capacity.

Thank you.
