### Description & Documents

Red cedar's warm tone, natural grain and unique texture is unmatched. Smooth texture and soft grain enable easy cutting, installation and handling, and it can be easily stained or painted.

- Kiln dried for stability
- Surfaced on one side and two edges - rough sawn face with a smooth back
- Western Red Cedar species
- # 3 and better grade where larger knots and other characteristics are not a concern
- Naturally resistant to rot and decay

**Dimensions:** 13/16" x 1-1/2" x 10' Actual Size  
**Shipping Dimensions:** 120.0 H x 1.5 W x 0.88 D  
**Shipping Weight:** 2.7 lbs

## Description & Documents

AC2® CedarTone Premium is truly a premium product. It has all the benefits of AC2® brand pressure treated and more! With a rich color, similar to coastal western cedar, it provides pleasing aesthetic performance for the first two years following completion of the outdoor project. After several weeks of outdoor exposure, the product will

change to a lighter, more natural color. AC2® CedarTone Premium treated wood products will maintain this cedar like color when natural cedar wood has faded to a gray color. In addition, it is treated with a higher level of preservative and a factory-applied water repellent to ensure your project will last longer.

- #1 southern yellow pine
- Rich color similar to coastal western cedar
- Environmentally friendly- safe for use around pets, playsets, and vegetable gardens
- Kiln dried and heat treated prior to pressure treatment
- Approved for ground contact applications; 0.15 pounds of preservative per cubic foot of wood
- Triple-coated, hot-dipped galvanized, or stainless steel fasteners are recommended
- MicroPro™/AC2® treated wood is NAHB Research Center green approved
- MicroPro™ lifetime limited warranty
- Building Code Compliant ICC-ES, ESR 2240
- Best color match is Ultra Advanced Stain & Sealant in Clove Brown sku # 553-4630

**Dimensions:** 1-1/2" x 3-1/2" x 10' Actual

## Description & Documents

Acrylic sheets are durable, lightweight, and transparent - making them a great replacement for glass. Acrylic sheets can be used in applications such as garage door windows, storm windows, and other home repair situations. In addition to this, there are many hobby related crafts such as shelf lining, cabinet fronts, and other do-it-yourself projects that are perfectly suited for this material.

- Acrylic construction for a lightweight material that is easy to handle
- Shatter-resistant material that is 10 times stronger than glass
- High-gloss, UV-resistant surface to protect against yellowing
- Higher insulating value than glass for greater energy savings

**Dimensions:** 0.220" x 24" x 48"

## Description & Documents

AC2® CedarTone Premium is truly a premium product. It has all the benefits of AC2® brand pressure treated and more! With a rich color, similar to coastal western cedar, it provides pleasing aesthetic performance for the first two years following completion of the outdoor project. After several weeks of outdoor exposure, the product will change to a lighter, more natural color. AC2® CedarTone Premium treated wood products will maintain this cedar like color when natural cedar wood has faded to a gray color. In addition, it is treated with a higher level of preservative and a factory-applied water repellent to ensure your project will last longer.

- #1 southern yellow pine
- Rich color similar to coastal western cedar
- Environmentally friendly- safe for use around pets, playsets and vegetable gardens
- Kiln dried and heat treated prior to pressure treatment
- Triple-coated, hot-dipped galvanized or stainless steel fasteners are recommended
- MicroPro™/AC2® treated wood is NAHB Research Center green approved
- MicroPro™ lifetime limited warranty
- Building Code Compliant ICC-ES, ESR 2240
- Best color match is Ultra Advanced Stain & Sealant in Clove Brown sku # 553-4630

# Charter Signs and Registration

Browse by

ALL

Sort by

FEATURED

**Welcome!** When your Library is registered and has a charter sign, it is an **official Little Free Library**. With registration, you join a worldwide network of Little Free Library stewards and gain our support to ensure your success.

**Did you know? Registering means purchasing a charter sign and putting it on your Library.**

Your charter sign will be engraved with a unique charter number. Your charter number is the unique

code that identifies your Library as an official Little Free Library. (Your charter number also gets you, as the steward, access to registration benefits!)

**If you bought a Little Free Library book exchange from our catalog**, your charter sign was included with your purchase. Your next step is to add your book exchange to the world map.

**If you built your own book exchange**, your next step is to register it through the purchase of one of the charter signs offered below. We're excited for you to join the Little Free Library family!

Your registration brings numerous benefits, including:

- An **official charter sign** engraved with your Library's unique charter number.
- **The option to add your Library to the world map**. People will use the map to find and visit your Library.
- **Access to a private Facebook group** for registered stewards. Swap stories and connect with other stewards!
- A **Steward's Guide** of proven tips to make your Library a vital part of your community.
- **A subscription to our regular e-newsletter** with inspiring stories, ideas, and special deals.
- **Access to brand new, deeply discounted books** through **First Book** for stewards in low-income areas. In addition, you will get special book offers from publishers via our e-newsletter.
- A **"How Does this Library Work?"** flier for your Library.

If you are considering ordering ten or more signs, please contact us at [customerservice@littlefreelibrary.org](mailto:customerservice@littlefreelibrary.org).

If you need to purchase a replacement charter sign, please [use this form](#).

**Ready to register? Click on each of the charter sign options below to get more details. Then, add the charter sign of your choice to your shopping cart and purchase it, and you've successfully registered!**

Kalamazoo Little Free Library Plans

## Building your own Kalamazoo Little Free Library

*These instructions provide step by step instructions for constructing a little free library (LFL). This project requires a moderate degree of experience working with wood and associated power tools. The design shown is modified from plans on the Little Free Library web site (<http://www.littlefreelibrary.org/plans-and-tips-for-builders.html>). We encourage you to check out this site.*

### Required materials and tools:

- Most LFLs are constructed from 3/4" plywood.
- The face frame and doors are constructed from solid lumber (mostly 3/4" x 1.5")
- Plexi-glass for door (if desired)
- Self closing hinges.
- Screws or nails for assembly
- Table saw (a hand-held circular saw can be substituted)
- Miter saw (power or hand)
- Power drill (if using screws) or hammer
- Post hole digger
- Level

**Cut list for plywood.** Be sure to wear appropriate protective gear when working with tools (see Hannah's good example above).

The structure of the LFL is made from 6 pieces (base, back, 2 sides and 2 roof panels) of 3/4" plywood.

- Base: 20.75" x 11.75"
- Back 20.75" x 20"
- Sides: 12.5" x 26.25" (2 pieces)
- Roof: 26" x 11.5" (2 pieces)

**Cut list for face frame and door.**

The door and face frame are made from 3/4" stock.

Face frame:

- Lower horizontal: 1.5" x 22.75"
- Upper horizontal: 2.5" x 22.75". This piece must be ripped at a 45 degree angle to enable it to fit snugly under the front roof section.
- Verticals: 1.5" x 16.5" (2 pieces).

Door:

- Horizontals: 1.5" x 21.5" (2 pieces)
- Verticals: 1.5" x 17" (2 pieces). This length assumes mortise and tenon construction of the door and allows for a 1" tenon on each end leaving an exposed length of 15". If you are using a butt technique (such as pocket screws or corner brackets for the door the length of the verticals should be 15")
- We recommend cutting the plexiglass for the door after all the cuts for the door have been made and dry fit together.

**Cut list for shelves:** Constructed from 3 pieces of 3/4" plywood or solid wood.

- Vertical: 9" x 15"
- Left horizontal: 9" x 9"
- Right horizontal: 9" x approximately 12" (when cutting the plywood leave this a little long. Cut to the exact length at the time of final assembly).

### Assembly of the main structure

- Attach the base to the back.
- Attach both sides
- Attach roof panels. The front roof panel should be attached first to provide slightly more overhang in the front.

### Face frame assembly

- Assemble components with pocket screws on the back of the frame. Photo to left.
- Attach face frame to the main assembly. The frame can be face nailed or attached with pocket screws from the main assembly.

### Shelf installation

- Assemble the left shelf and the vertical support. Affix to body of the LFL.
- With the left shelf in place, mark the right shelf and cut to size. Install left self. A small piece of ply used as a spacer will help ensure the right self is level.
- Apply facing to self if desired

### Doors

- A variety of door styles can be used. We generally incorporate a piece of Plexi-glass, but solid doors are another option.
- Spring loaded/self closing hinges will help keep the door closed. A latch is also a good idea.

### Roofing

- Possible materials include- Cedar shakes, metal roofing, tin, copper flashing. Pick a material that compliments the other materials you have used.
- Be sure to use some sort of ridge cap to ensure weather tightness.

### Mounting Post

- A 4x4, 5 ft. long is a good length.
- Angled supports attached to a scrape of plywood provide a good mounting surface.
- The post is set in a hole 24-30" deep. Concrete is generally not needed.
