

**Rotary Club of Townsend
 Rotary District Grant Application Narrative and Budget
 For
 American Legion Post #42
 Roof Extension Project**

The American Legion has been fighting several issues over the years in the rear of the building. The roof runoff has created problems with drainage towards the rear of the building. To resolve the problem, the Legion has been fundraising for several years to build an addition in the back of the building to increase storage space for the use of the Legion to better serve Broadwater County Veterans. They have raised \$12,000 to date. An existing storage shed that is contributing to the drainage problems would be removed. The roof extension from the new addition would allow for gutters to help direct runoff away from the building. This rear extension would improve the looks of the building from the rear alley. The \$1,000 from Rotary District 5390 would help complete the fundraising efforts for the \$17,000 project so it could be completed this summer 2019. Please give this project your serious consideration.

EXPENSES (based on preliminary low bid from contractors)*

Contractor Low Bid for Construction of floor, walls, and roof	\$ 12,000
Paint, Trim, and Supplies for Rotarians to complete final finish work	\$ 1,000
Roofing Supplies for Rotarians to Complete the Roof and Gutters	<u>\$ 4,000</u>
Total	\$17,000

*Expense listed indicate that depending on the success of pending grant applications and the use of Rotarian labor, the amount and quality of paint, trim, roofing materials will be upgraded from basic design in low bid to metal sheeting, etc. Also, gutters will be installed.
