Areas of Focus (Check all that apply, if any)

- Peace and conflict prevention/resolution
- X Water and sanitation**
- Basic education and literacy
- Disease prevention and treatment
- Maternal and child health
- Economic and community development

Project Summary: Rotary Club of Red Lodge has historically worked with the City of Red Lodge to build, maintain, and improve access to parks in our community. Rotary Club is working alongside the 2018 Rotary Youth Leadership Award (RYLA) camp attendees to establish a water bottle filling station in downtown Red Lodge, Montana. The goal of this project, Refills Not Landfills, is to reduce plastic waste in Red Lodge by reducing our reliance on plastic water bottles, and to provide the citizens and travelers of our community with clean, fresh water.

Project Description: In the fall of 2018, the Recycling Center in Red Lodge experienced some major changes; one of which forced the center to stop accepting plastics. In an effort to reduce plastic waste in the Red Lodge community, four RYLA students worked with the Rotary Club to identify a project that would reduce our reliance on single use plastics. Installing a water bottle filling station in downtown Red Lodge was identified as the best option. The Refills Not Landfills project kicked off in the fall of 2018 and students began fundraising and presenting the project to school and community groups. Red Lodge Rotary presented the group with \$200 of start-up money to get the project off the ground. Since then, the RYLA group has collaborated with numerous community partners and businesses to raise money for the project. **To date, the RYLA group has raised \$11,958 through direct donations, in-kind donations, and by selling reusable water bottles. We hope to complete the project by early Spring of 2020. We were awarded a matching grant of \$2500 from Rotary District 5390 with the condition that our original budget shortfall was met. Since the time of submission, our students have decided to move the project one block north to a more suitable location which dramatically reduces our construction budget (see attached, modified budget). When Rotary District 5390 releases the awarded \$2500, our project budget will be balanced at \$14,457.56. To date, the water station has been purchased and ordered with locally raised project funds. When the ground thaws, installation of the water system will begin. The project will be finished in Spring of 2020.**

Red Lodge Rotary members are supporting the project financially and have agreed to provide labor as needed. The RYLA group has taken the lead on the project and has worked closely with Red Lodge Rotary, City Council, Public Works Department, Garden Club, Parks, Trees, and Recreation Board, and a number of other community organizations to plan and implement this project.

Four students who attended RYLA Camp in the summer of 2018 returned home to their community inspired to make a difference. After receiving \$50 each from Rotary of Red Lodge, these students pooled their money and started planning a project that would not only reduce the use of single use plastic bottles and plastic waste in Red Lodge, but also provide clean drinking water to the public. These students have worked closely with community businesses and organizations. They have presented and promoted their project to the Red Lodge City Council, Red Lodge Chamber of Commerce, Public Works Department, Garden Club, Carbon County Resource Council, Parks, Trees, and Recreation Board, Green Team, and Interact Club. The project has been approved by the Montana Department of Environmental Quality, the Montana Department of Labor and Industry, and the Montana Department of Public Health and Human Services. The water station will be free and available to the public year round. The image above shows the RYLA group presenting at the annual meeting of the Carbon County Resource Council.

Many businesses and community organizations have shown support for the project through direct donations and cross-promotion.

The water bottle filling station will be located next to the parking lot of the Pollard Hotel and will be marked with attractive signage stating that this is a Rotary Club Project. The signage will include a metal plasma cut Rotary Club Logo and will be placed on the wall behind the water bottle filling station. The water filling station will be incorporated into the existing ATM enclosure at the intersection of 11th Street and Broadway.

Nestled in Montana’s magnificent Beartooth Mountains and surrounded by the Custer Gallatin National Forest, Red Lodge delivers world-class outdoor recreation and access to Yellowstone National Park via the world-renowned Beartooth Highway. No matter what the season, Red Lodge is the Base Camp to the Beartooths. Red Lodge draws between 75,000 and 100,000 visitors each year as they pass through our community on their way to Yellowstone National Park or to recreate in the wilderness.

Project Budget

PRODUCT DESCRIPTION/DETAILS

Outdoor Bottle Filling Stations ideal for educational campuses and recreational areas. Powder-coated exterior over a corrosion-resistant stainless steel type-316 base material to provide protection from the elements.

- Corrosion-resistant base material provides the ultimate protection from the elements.
- Heavy-gauge construction with tamper-resistant screws that resist stains and corrosion.
- Laminar flow provides clean fill with minimal splash.
- Fully sealed, freeze-resistant system minimizes ground water contamination and prevents drain water from mixing with fresh water.
- Available in 12 stunning finishes.
- Ideal for outdoor use.
