Background/Problem:

Buhoma Town Council being one of the most tourist destinations in Uganda Bwindi National Parks happens to be a home for not only the endangered Mountain Gorillas and other animals but also there are vulnerable people especially the youth Batwa and other needy families. Bwindi harbors a total population of approximately **8,600** people as per the Community Information systems (CIS) a body (ies) controlled by the Population Secretariat and Uganda National Bureau of Statistics (UNBOS).

Over **6000** people live below the poverty line thus declared as poorest of poor, this means that **Send a Piglet** –for one’s self in a lifetime is always difficult, thus Batwa and other needy persons in the Bwindi community need to get this opportunity to keep them busy while during this lockdown and after even when the lockdown is gone to benefit and embrace tourism and conservation, and conserving for future generations.

When achieved by BBCO it, shall lead to community benefits due to the poverty status in the area. Less than half of the families can’t afford to own or buy a piglet, hence a call for intervention by well-wishers, Donors and friends and Development partners to Embrace Conservation and pass through these hard times of **COVID-19**.

Target Beneficiaries:

For totality and to have Sense of ownership and be direct and part of the project when funds are raised the members or beneficiaries shall give a commitment fee of One Thousand Shillings (**1000**) and the Bwindi Batwa Cultural Organization Staff train them on how to raise the Pigs that will be have been bought when the funds are available this shall be a role of implementing partner to recruit member beneficiaries from time to time as time goes on especially when the first old pigs have been bought until the first phase of targeted beneficiaries.

Then when they give birth, the Bwindi Batwa Cultural Organization shall recruit next round needy beneficiaries and keep their records for the ‘ **Send a Piglet to Youth Program** –to proceed in future these members will be directly beneficiaries of the piggery project from time to time and shall have a piggery share each time the pigs give out piglets that have been bought.

And as thread proceeds to entire communities of Batwa and other needy persons.

Problems/ Challenges Currently Faced:

The people in the target families of Batwa and other needy persons that are currently unable to get money to buy Piglets which will be the benefit from this project, so it will be a **Send a Piglet program** –'in the Bwindi community benefiting youth where this project shall be implemented. The eligible members shall from time to time identify the members to benefit in each calendar year after having sat and agreed to identify the members who shall benefit each newly recruited member to take a piglet and as well be trained and be eligible, available and ready to take the mantle of taking care of the piglet given from time to time.

How many Beneficiaries:

The project shall start to Benefit **10 Households/Homesteads** and later on shall increase the number when the first batch of 10 Old Pigs are bought and cared for after when they give birth it's when the project shall seek addition of newly youth beneficiary members to benefit from the **send a Piglet Program** as designed by the first members who are starters/first beneficiaries that shall be managed and monitored by the team and staff from Bwindi Batwa Cultural Organization of Which is the implementing partner.

Monitoring Evaluation& Reporting:

The Project will be monitored by the Project supervisor's who shall be selected on merit in all its phases. Supervision and collection of data from beneficiaries be captured and filled in the office for future records and accountability to the donors on timely and following their guidelines from time to time so as the project becomes sustainable all times from the time of implementation.

Monthly progress information will be done by the project supervisor's or any person delegates to do the duty. The compilation report will be prepared at the end of month until the first batch of **10 Old Pigs**- have all given birth, then names of the beneficiaries shall always been filled and sent to the Donors for accountability with their photo albums .
