Literacy with Digital Inclusion	Basic Education and Literacy	In development
Virtual reality for medical procedures in hospitals and health posts	Maternal and Child Health and Disease Prevention	Pilot in progress
Basic Sanitation in Bororé Island	Water Resources and Basic Sanitation	In development

# Project Detail

## Location: Grajaú, São Paulo, SP, Brazil

Grajaú

### Main Objective:

Mothers' Milk Bank Adequacy at Grajaú General Hospital (São Paulo SP Brazil)

### Main actions:

Areas adequacy, investment in equipment and furniture, staff suitability and workflows developments.

## Current Status

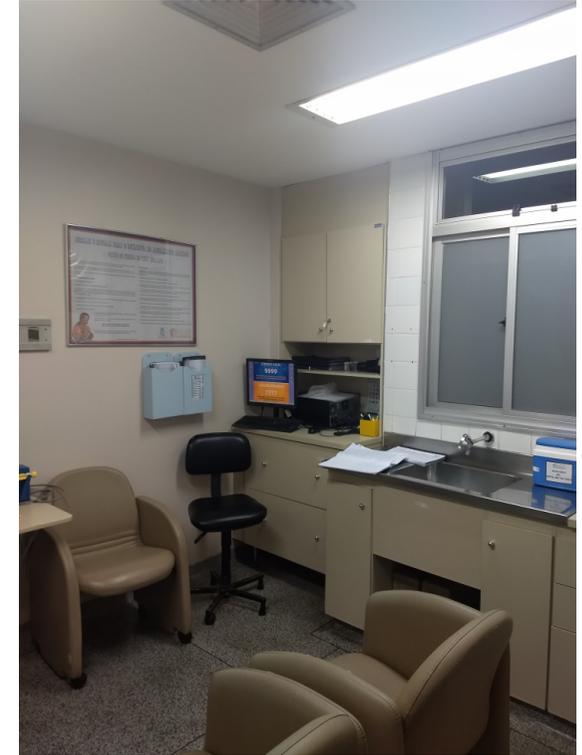

---

Outside view of the Collection Room, where the donor changes clothes and leaves the apron in the corridor, compromising privacy, generating risk of contamination and unnecessary and uncontrolled displacement

# Diagnosis

---

Areas without division, mothers' registration near the collection area, risk of contamination, lack of privacy, inadequate by the criteria of the legislation.

## Diagnosis

---

Inadequate space between armchairs, lack of space for tables for each armchair, risk of contamination, crossed flows, risk of milk exchange by proximity. Moving this room to the new area of the proposal, this space is freed up and a place of observation for up to 3 stretchers or 2 beds is gained. Room has gas regulation.

## Project goals

---

- 24-hour room operation

- Best experience for the donor mother

- Increase supply of human milk for pasteurization

- Increase availability of human milk for hospitalized babies

- Increase the number of beds in the Humanized Birth Center

The investment to achieve this goals is BRL 188.573,06 which is equivalent to USD 50.965,69.

## Composition:

- Rotary International Foundation: USD 25.482,85
- District 4420 Brazil: USD 12.741,43
- **US District Partner: USD 12.741,43**

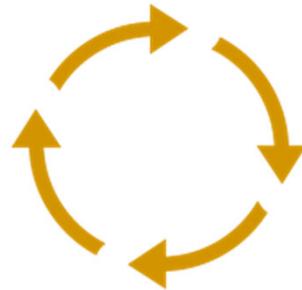

# Sustainability

---

The Grajau General Hospital is a Government health facility, managed by a Social Health Organization, the Institute of Social Responsibility Sírio Libanês (IRSSL), which will ensure, in partnership with the State, the continuity of this project.

The adjustments related to works and labor will be supported by the hospital. The operation of the equipment will be made by trained staff and the maintenance and replacement of parts of the equipment will be subsidized by the Institute of Social Responsibility Sírio Libanês.
