RC San Diego  
District 5580  
Family and Friends

# Perinatal Laundry and Sterilization: Before and After

# Before

Mothers and Babies were Dying Because Clean and Sterile Instruments and Supplies were not Available in a Timely Manner for C-sections and Vaginal Deliveries

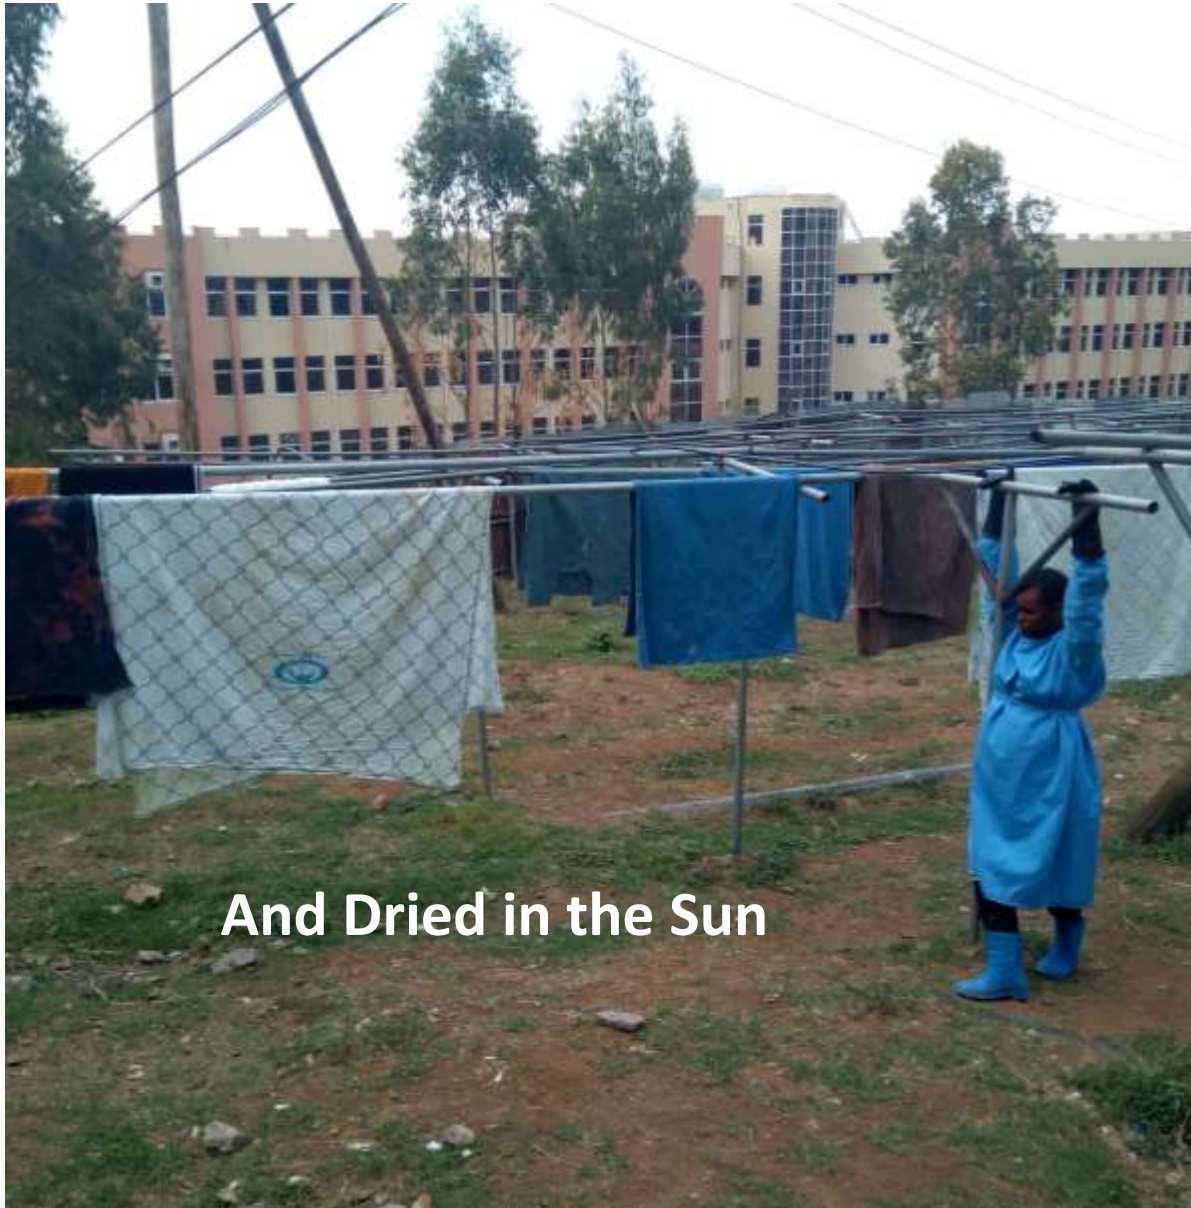

**Dirty Laundry  
was Transported  
to a Distant  
Central  
Processing  
Facility Allowing  
Stains to Set and  
Linen to be  
Ruined**

**Broken  
Machines Meant  
Much of the  
Laundry Had to  
be Done by  
Hand**

And Dried in the Sun

# After

Rotary Global Grant GG 2094220 Developed a Perinatal Central Processing Facility Located Under the Obstetric Operating Room at the University of Gondar Hospital It Provided a Hospital Grade Washer, Dryer, Autoclave and Water Softener for the Obstetric and Neonatal Departments

**Pretreatment Area**

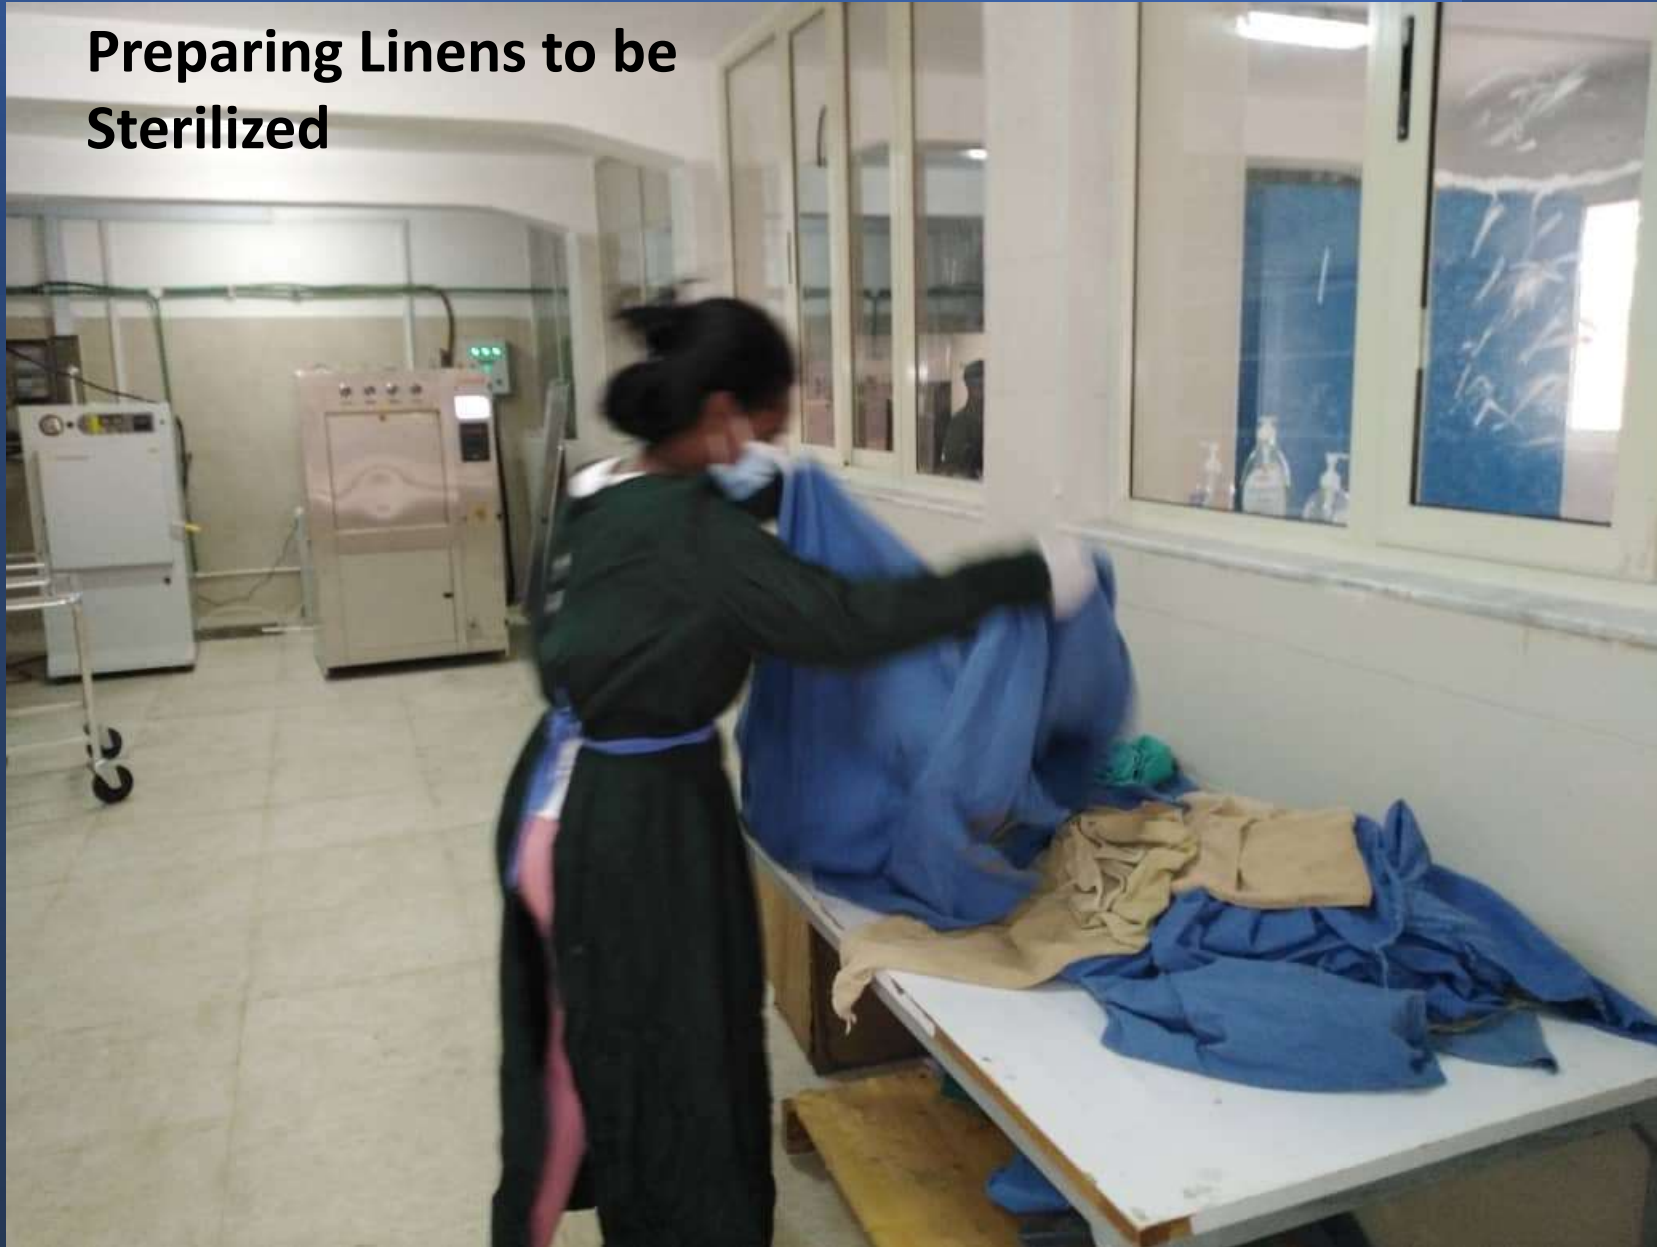

## Hospital Grade Washer

## Hospital Grade Drier

## Preparing Linens to be Sterilized

♥ ⋮  
**Sterilizing Linen and Instruments in the Autoclave**

- **Now Clean and Sterile Instruments and Drapes are Available for Every Delivery at the University of Gondar Hospital.**

- **No Mother or Baby will Die Unnecessarily because of lack of Sterile Supplies**

- **Thank You Rotary!**

- **And Thank You:**
