

HELPER

Today, no one needs to explain why life in the modern world is becoming more and more dangerous, and Ukraine, unfortunately, did not become an exception in this sad trend.

However, we should clearly understand: injuries, burns, fractures, injuries, electric shock – all cases of "trauma" - are not always the course of terrorism, fires or natural disasters. Any injury can happen in any "safe" place.

Then the account goes for a minute to arrive "fast". But in 40% of cases ambulance can arrive late ...

Mission and Vision

To teach and help children throughout the country. Bring the project to a permanent systematic level in all educational institutions of Ukraine.

Project Aims

- To save children's lives and to teach them systemic help;
- To create a system for learning the practical skills of first child care and teachers in schools;
- To introduce the integration of the course from the first premedical care into the school courses "Protection and safety of life" and "Protection of the fatherland", which will be taught by already trained teachers of the same schools;
- Millions of children at school will be trained in emergency medical assistance within the courses "Protection and safety of life" and "Protection of the fatherland";
- Get involved with state support and get funds from "Public budgets"

Our Support

6 Ministries:

Ministry of Health;

Ministry of Education and Science of Ukraine;

Ministry of Youth and Sports;

Ministry of Social Policy;

Ministry of Culture;

Ministry of Information Policy

HELPER

PROJECT FOR TEACHING AND HELPING CHILDREN

THOUSANDS OF CHILDREN DIE EVERY DAY
DUE TO LACK OF TIMELY HELP:

WE TEACH CHILDREN IN SCHOOLS
AND OTHER INSTITUTIONS

MORE THAN

200

CHILDREN

WE HAVE ALREADY TAUGHT / HELPED
AT KIYIV SCHOOLS TODAY

MORE THAN

1000000

CHILDREN

WE PLAN TO TEACH ALL OVER UKRAINE

TRAINING IS CARRIED OUT BY CERTIFIED SPECIALISTS

WE SUPPLY CHILDREN WITH NECESSARY
EXERCISE EQUIPMENT, EQUIPMENT, HARNESSSES,
BANDAGES, MEDICINES, TRAINING MANUALS

What we Do

We apply to the "Public Budget" for the purchase of the necessary equipment and training on the provision of first aid at the systematic level. The training will be conducted for teachers and children within the course "Protection and safety of life" and "Protection of the fatherland".

The acquirer of the project (put on your balance) can ONLY state institution (a school, a high school).

After winning the project, the procurement is carried out through the Transparent System, which makes the project transparent and public.

What we purchase

- Mannequin for the development of cardiopulmonary resuscitation (CPR) in adults and children
- Training automatic external defibrillator with auto education option + brochure and technical specification
- Spray for disinfecting a mannequin
- Masks for safe ventilation of lungs for an unfamiliar victim during CPR
- Shoel-turnstile, elastic bandage, masks
- Orthopedic collar for immobilization of the cervical spine
- Rescue blanket (thermoclave)
- Bandage gauze, gauze band and much more
- The training is certified for teachers lasting 5 days for 8 hours a day (as a result, we receive an instructor-rescuer)

With HELPER project we get

- Changes in society

You are joining the driving force of change and influence on the formation of our better future, because the children - and this is our future!

- Reputation

Positioning corporate social responsibility and caring for employees and their children.

- Recognition

Support for the big project in Ukraine, which has already been joined by 6 ministries and the media

HELPER PROJECT CO-ORGANIZERS

1. All-Ukrainian Charitable Foundation "Ukraine-UNESCO"
2. Charitable Foundation "Club Divosvit"
3. NGO "Board of resuscitation (resuscitation) and emergency medical aid"

Strong Sides

- Collaboration with European-certified experts with 10 years of experience;
- Implementation of a pilot project in the Lyceum at NTUU "KPI named after Igor Sikorsky" and several schools in Kyiv. To date, more than 400 children have been trained;
- Conduct a large number of trainings and exercises, through which students will be able to learn first aid not only within the project, but also for relatives and other people;
- Development and use of a mobile application for the distance learning of children;
- Similar systems-analogues exist in countries such as Israel, the United Kingdom, and the United States, which allows them to use their experience, working out 50-60 years, with the involvement of experts;
- Methodological materials have already been developed and coordinated with the Ministry of Health, the Ministry of Education and Science, the All-Ukrainian Resuscitation Council (the official representative of the European Council of Resuscitation Technicians in Ukraine).

Our Future

- As a result of the project, children will be able to receive emergency medical care (until ambulance arrive);
- A large number of teachers and students will be trained and will be able to provide first aid promptly;
- Being a helper-volunteer will be honored and fashionable;
- Our project will become national, providing us to transfer our work to other areas (assistance to people with disabilities, old people, orphans, etc.).
