Some facts about Majhi Community-Botetar

- Majhi Community are indigenous and backward community of Nepal
- Their livelihood are primarily based on fishing in rivers or ponds
- Due to lack of fishes because of electric fishing & sand takeout their live hood are in danger
- After lack of fishes in river they are involved in sand intake from rivers but after local government controlled sand intake most of the village people are unemployed and many of them are preparing to go abroad for work taking loan from some financial institutions.
- 95 % houses of this village were destroyed by NepalEarthquake2015 and 3 people died & 20 were injured. They still rebuilding the houses with the help of Nepal Government (USD.3000) and loan of about USD.15000 from cooperative at the interest rate of 18 % . Government emphasis to make earthquake resistance house but it is quiet expensive for the community like this which has no employment and struggling for livelihood.
- Young people has started to go school but still see no future and dropout has increases.

Status of Livelihood

1. People used to do their traditional professional (Fishing at River) for livelihood.
2. Their old traditional professional is almost extinct due to electric fishing and sand taken out of river.
3. After NepalEarthquake2015 , 87.25 % are unemployed due to destruction of houses and dead of animals. People started to have livestock as profession before at small scale.
4. Reported to have girls trafficked in temptation of having good job & life.
5. Few people have gone abroad (Arab Countries) for work.

There are 5 public water taps for 328 peoples

One of the few toilets in Village

Kitchen of people of Mushar community
