

Stacey

Good morning, all,

To make it easier on all concerned, I will include this email as documentation on the project so you will not need to redo the report. :)

Stacey

Dennis,

This was a case where our actual project costs was \$200 less than the anticipated expense of \$6,700. Both the club and the District put up \$3,250 each towards it. As Stacey pointed out, the "Income" Section of the Final Report should reflect identical amounts of \$3,250 from the club and District totaling \$6,500. Please let me know if I may provide additional information. Thank you.

Dave

Helen, I remember you telling Dave Williams and myself to leave it the amount actually spent. Did I get that right? Please look at Stacey's message below.

Good evening, Dennis,

I just had an opportunity to review the final report which was posted on matchinggrants.org. I noticed that the club funds are \$200 less than the district grant funds. A requirement of the district grant program is that club funds must equal (or exceed) the amount of the district grant funds. The receipt for the project

totals \$6,500, consistent with the club's lower contribution. The club must contribute at least \$3,250 (and a new report needs to be uploaded).

Thank you.

Stacey
