Dear Pam,

Yesterday we started with the first course, with 165 kids from a High school in the area, that was damaged by the earthquake, during which the ceiling and walls started to fall down in their desks.

The ministry of Health asked us to work with them because they started with anxiety problems, lack of sleep and panic attacks.

We have one teacher and 8 volunteers working this week for four days, because the number of teenagers involved, numbers changed a little, they are not spending in Hotel because we found a house in Morelos where they could sleep in, and the teacher have a van.

I will send you the tickets as soon as they finish this course, and I am sending the pictures attached.

I hope this is a good start!

Love  
Pam
