

## ADDENDUM TO 2021- DISTRICT GRANT FINAL REPORT

Q. 3. Who were the beneficiaries, how were they impacted by this project, and what humanitarian need was met?

274 students at all grade levels were provided with internet access in their homes. These MIFI devices come equipped with one year of pre-paid Wi-Fi access. These have allowed the students to engage with their teachers while learning virtually from home. In addition to class time, the devices are providing students the opportunity to conduct on-line research, participate in workshops and in extra-curricular activities. The devices are also providing easy access to school counselors and social workers for those students needing counseling services. Furnishing the MIFI units to needy students is helping to equalize opportunity with more affluent students.
