

5/23/2022 & 5/30/2022

To 7230 District Grant Committee,

I purchased and paid for 150 Sawyer water filter units and 200 Luminaid Solar Lanterns. I paid \$5,995.83 for the purchased items in order to expedite the process with the authorization from the Bronx Rotary Foundation and then I was reimbursed for the same amount from the Haiti Project funds by the Bronx Rotary Foundation.

150 water filters were shipped to Rotarian Jim Kushner's home and he packed them and took them personally to Haiti. Rotarian Jim Kushner met with the member of the RC of Pettion-Ville in Haiti and over a week's time, they travelled to hill top villages where the water filters were distributed to the community members in need of clean water.

200 Luminaid Solar Lanterns were ordered to be shipped to Haiti in order to help community members that had lost power and did not have access to light. 185 units were shipped directly to Haiti via DHL, due to restrictions of airlines only allowing large quantities of this type of devices to be shipped by specially equipped aircraft that DHL operates. This created a delay in customs in Haiti which is now over.

Copies of the checks and receipts have all been submitted.

A letter of attestation has been provided by the RC of Pettion-Ville in Haiti and submitted as part of the documents.

Please let me know if you have any questions.

My best,

Amir Asadi

Chair, International Service projects, District 7230
