Cancer Cure is the motto of our Project and hence If we are able to prevent the spread of the Cancer from Stage1 to Stage 2 and irreversible Stage 3, we could prevent lot of hardships to the affected patient and that in turn saves the patient's life and stress to the family.

How did your project team identify these needs?

The Team of Doctors, from the Partner Hospital informed us about the large number of people requiring treatment who are not able to afford the cost of treatment at Stage 1, itself.

How were members of the benefiting community involved in finding solutions?

How were community members involved in planning the project?
