Chennai, India.

Dear Sirs- greetings from Padhar Hospital. Trust you are keeping well even in these times.

Thank you for your willingness to partner with us, reaching out to us and offering us to help out in this difficult time of the second wave of COVID.

We are seeing many admissions in our COVID ward- total capacity of 67 beds with 12 in the HDU (High dependency unit) and the rest in the private and general wards. In all these areas we have patients dependent on oxygen- which we are delivering via nasal prongs and face masks using oxygen from our plant, oxygen from the oxygen concentrators and oxygen cylinders. We are seeing two, sometimes three deaths every day, new admissions and some patients being discharged.

The entire hospital work force is working round the clock, to help with treatment and care of these patients. The needs are great at this time and we know that the same scenario is being played out all over the country.

We are requesting funding for an ambulance with a ventilator which will be needed for transportation of patients who are dependent on oxygen.

Thank you again

Warm regards

Dr. Rajiv Choudhrie, M.S., M.Ch.
Medical Superintendent
Padhar Hospital
Padhar, District Betul
Madhya Pradesh.
