COMMUNITY PARTNERSHIP.

We shall partner with the community in this project. The community shall provide a public land to drill the borehole. The county government has already planned the area and a public land has been set aside for a market place, a bus park, secondary school and a primary school. The county government shall assist in managing the new market sustainably. Our proposal is to drill the borehole in the market grounds at Indikiro Trading Centre, within Saikeri Location. See the satellite map attached.

2.0 BACKGROUND

A short statement describing the applicant organization, including a brief history, the mission, and status as a non-profit NGO:

RC NAIROBI MUTHAIGA NORTH Kenya, is a chapter of District 9212 in Kenya, which was chartered eight Years ago, in December 2013, in Nairobi, Kenya. The club has grown from 38 charter members to 93 current members. It is one of the best performing and active club in District 9212. The club is a mother club to three Rotary Clubs and one Rotaract club. This phenomenal growth is attributed to the club's stable leadership. All past presidents and a past District Governor serving at Rotary International Level, are active and resourceful members of the club. In the past years RC Nairobi Muthaiga North Club has successfully managed two global grants in maternal and neonatal child health

GG No. 1642555 - Phase 1: Value USD. 91,000

And

GG No.1868283 - Phase 2: Value USD. 92,000

Our Vision statement: Together we will CREATE impactful and lasting CHANGE in our COMMUNITIES and OURSELVES

Our Mission Statement: To support and promote Rotary service and image within the communities and Rotary families, strengthening membership and fulfilling our goals.

3.0 THE PROJECT DESCRIPTION

What is the problem that this proposed project seeks to address?

Saikeri is located within Kajiado County in Kenya and most of the inhabitants are the "MAA Community". It borders Kiambu County which is inhabited by the Kikuyu Community. Saikeri area has about One Thousand (1,000) households with an average of seven (7) members in each household. These communities have been fighting for surface runoff that had collected in a private farm in Kiambu County.

We shall drill a borehole, install solar panel to pump water through renewable energy, erect a stand for the water tanks; build a water kiosk, erect a market shelter areas, put up human shelter at the bus stage, train the

communities in micro lending (Table banking) and register community based organizations.

This will address the main conflict areas and provided permanent source of water which will bring peace among these neighbours. The sale of water will also boost the economic well-being of the residents.

4.0 EXPECTED OUTCOMES

What are the goals of the project, and the activities that will be implemented toward those goals?

The project aims to foster peace between the two communities, open a new market and introduce trade as an alternative to pastoral farming.

The borehole shall be drilled in the market place and the water shall be the first commodity of trade.

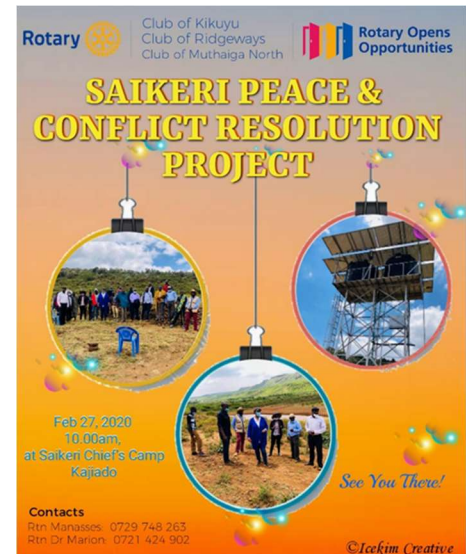

The two warring communities shall no longer fight for water, but they shall trade with each other.

5.0 JUSTIFICATION

What is the expected impact of the project?

1. To provide sufficient water for domestic use and livestock;
2. The water as a market commodity will be the precursor for open of a modern open air market;
3. To spur economic growth, empower over 1,000 families;
4. Reduce the distance travelled by women and girls to fetch water for domestic use;
5. Reduce the distance travelled by families to shop for household items. They travel over 40KM to Ngong town for shopping. There is no system of public transport;
6. Reduce the distance covered by Men and boys in search of water for the livestock.

6.0 MONITORING AND EVALUATION

How will this project be monitored and evaluated?

- 1> The market shall be managed through the County government;
- 2> The water shall be sold through a community based Society;
- 3> Club members shall make visits to project location which is approximately 75Kilometres from Nairobi city.

7.0 BUDGET AND TIMELINE

What is the estimated cost of the project? (Including a full budget is not necessary at this time.)

The project is estimated to cost One Hundred and Seventy Thousand Dollars (USD. 170,000)

8.0 IMPLIMENTATION METHODOLOGY

Over what period of time will this project be implemented?

The project is expected to take approximately Twelve (12) Months from the date of securing funds.

The project will be implemented as outlined below:

1. The identified site for the construction of the borehole. To ensure community inclusivity this will be on government or communal land so that no single family or individual can claim ownership. Suggested areas is the common market place owned by the county government
2. The club will secure the necessary Water Resources Authority Management WARMA licenses and approval before launching the project.
3. A government approved contractor will be engaged to construct a borehole of storing water over extended periods of drought.
4. The club will assist the municipal office improve the market area
5. The club will assist train on economic sustainability

9.0 NEEDS ASSESSMENT

OUR CLUB HAS SEVERALLY INTERACTED WITH THE COMMUNITY IN RECENT TIME. WE HAVE CONDUCTED NEEDS ASSESSMENT.

1. We organised a peace baraza;
2. On a different occasion we organised a food drive in December, 2021. The community was hunger-stricken;
3. We have visited and met elders of both communities.
