Dear Brother Tom,

Thanks for the reply regarding the quotation from the suppliers of the tractor and the implements.

I have other quotations from other suppliers I will be sending you shortly.

The reason why I chose the tafe tractor was because they were originally Massey Fergusons.

I chose them as the supplier because their tractors are good and we can easily get spares for them in the country. The price is good and therefore low costs maintenance.

New Holland is Ford, they are good tractors but Maintenance costs are high because of the high cost of spares.

JOhn deere is a good tractor but spares and very expensive in Uganda and therefore high cost of Maintenance.

Other tractors I am not very sure about, though people say they are good as well.
