## **Project Overview**

---

**Tell us a little about your project. What are the main objectives of the project, and who will benefit from it?**

In support of Rotary's Basic Education and Literacy area of focus, the Rotary Club of Nairobi-Langata embarked on a project that was geared towards bringing digital access and literacy to over 5,000 students and 100 teachers in primary schools across Kenya through setting up sustainable digital labs.

The objective of this program is to improve access to digital literacy for children in under-served communities and close the digital divide while providing them with skills to make them competitive on the global platform. The specific aims of the program are:

- i. Equip targeted schools with desktop computers and supporting equipment to enhance digital learning experiences.
- ii. Provide enriched learning resources and content for use in teaching students, resulting in improved academic performance.
- iii. Enhance teachers' capacity to effectively integrate digital tools into their teaching methods.

Funds from this grant application will be applied for implementation of digital labs in five (5) schools in Kenya:

- i. Nairobi South Primary School, Nairobi County
- ii. Kiawaroga Primary School, Kiambu County
- iii. Kholera Primary School, Kakamega County
- iv. Kimutwa Primary School, Machakos County
- v. Kimoning Primary School, Uasin Gishu County

We have successfully implemented this project in seven (7) schools in the last two years, in different parts of the country which currently serving a total population of 3000 students and 50 teachers

## Sustainability

### Humanitarian Projects

## **Project planning**

### **Describe the community needs that your project will address.**

The schools targeted in this global grant project are located in under-served communities. The schools have a challenge in delivery of ICT learning content efficiently to all learners in the school because of the large number of students and varying age groups.

The communities that have been targeted have competing priorities for limited resources and cannot afford access to computers and internet connectivity in their homes.

The key challenges identified in the five schools include:

- Lack of dedicated space / digital labs where digital learning can happen.
- Teachers are inadequately trained in use of computers and delivery of digital education
- Current machines delivered by donors including the Kenyan government are poorly maintained and prone to failure, and the few working machines are outdated.
- They lack access to digital learning content which is prohibitively expensive for rural schools.

### **How did your project team identify these needs?**

Through our service projects committee, we reached out to rotary members in our club to identify public primary schools in under-served areas that would benefit from digital literacy programs.

Numerous schools were shared and the projects committee was able to vet the schools that had a priority need for digital literacy labs.

This was done through a questionnaire to not only identify the schools that have the need but also can sustain the program for the long term.

This was followed by a community assessment visit to verify the information provided by the schools and engage stakeholders to identify the specific needs.

### **How were members of the benefiting community involved in finding solutions?**

Through the needs assessment we are able to interact with the beneficiaries; the students and stakeholders: school management, alumni and parents who strongly shared the sentiments that digital labs were crucial to the learning process for the pupils to prepare them for the digital future that awaits them.

The school management, parents and alumni committed to supporting the project through the payment of recurrent costs and providing additional support beyond what is to be provided as part of this project.

### **How were community members involved in planning the project?**

The school management, alumni and BOG were able to assign one classroom for the set up of the digital labs as well as committing to the maintenance of the labs.

## **Project implementation**

### **Summarize each step of your project's implementation.**

Do not include sensitive personal data, such as government ID numbers, religion, race, health information, etc. If you include personal data, you are responsible for informing those whose personal data is included that you are providing it to Rotary and that it will be processed in accordance with Rotary's [Privacy Policy](#).

#	Activity	Duration
1	Baseline survey and needs assessment	1 Day
2	Beneficiary and stakeholder sensitisation:Creating awareness among Board of Management, teachers, students, parents, and the host community on the importance of this project.	1 Day
3	Refurbishment of designated computer room to meet requirements of a computer lab	20 Days
4	Computer room furniture assembly.	5 Days
5	Setting up of the Local Area Network including internet connectivity	5 Days
6	Software installation and testing of computer equipment	3 Days
7	Deployment and set up of all required equipment and furniture to the school	3 Days
8	Teacher training and inclusion of computer lab classes in school time table	5 Days
9	Trial classes and orientation of pupils to the computer lab	5 Days
10	Monitoring and evaluation activities: data collection and reports	5 Days
11	Project handover	1 Day

**Will you work in coordination with any related initiatives in the community?**

No

**Please explain. Are local initiatives not addressing these needs? Or, if they are, why did you decide not to work with them?**

The government project delivered tablets but did not adequately address post hand-over maintenance in terms of planning and execution. The tablets had limited specifications and are currently not upgradeable. The content loaded addressed 2 or 3 lower primary classes and not updated as more classes came into the new curriculum. In short the tablets have very limited use.

Given the problems experienced with the government tablets, we opted on getting desktops which are sturdy, easy to maintain and repair making them suitable for the long term.

To ensure sustainability, we made sure the schools benefiting from this program are capable of the maintenance and recurrent costs as indicated in the MOU.

CFSK, our cooperating organization, will be offering training and maintenance for such labs at a manageable cost after the first year. This is their core business and they have been working with schools and learning institutions for 20 years in this space.

Moreover, we are working with the school and alumni bodies to offer additional support in the maintenance of these labs to ensure sustainability.

**Please describe the training, community outreach, or educational programs this project will include.**

The computers will be fitted with government approved education curriculum which the school is expected to

implement.

The educational program includes five packages each for Grade 1-6:

Five (5) teachers per school will be trained on computer literacy and content delivery with the expectation that they will then pass on this knowledge to the rest of the teachers in the school to effectively use the computer lab for class content delivery. This is one of the benchmarks that we check during our M&E - how many additional teachers have learnt to use the labs for classroom delivery.

### **How were these needs identified?**

We conducted a training needs analysis during the community assessment to determine the computer literacy levels for the pupils and teachers.

### **What incentives (for example, monetary compensation, awards, certification, or publicity), will you use, if any, to encourage community members to participate in the project?**

The best performing pupils and teachers whose subject has shown marked improvement will be awarded during the school prize giving day.

The participating alumni members can be awarded certificates of appreciation by the school board. Recognizing the school board through media publicity , such as press releases for creating an enabling environment to set up the digital labs.

We shall continuously provide mentorship to the students, teachers and parents as well as organize for inter school partnerships and international collaboration through the developed computer platform.

We shall also invite ICT professionals to conduct talks on applicability of ICT skills after school

### **List any community members or community groups that will oversee the continuation of the project after grant-funded activities conclude.**

The school management and parents association have committed to setting aside annual funds for the maintenance of labs.

The alumni association has offered to support in the maintenance costs of the lab.

There shall be continuous monitoring of the computer lab usage will be done through an attendance register.

The teachers will be required to record information about the usage including date, time, duration, class, number of students, subject and topics taught during the session. Additionally, there shall be a classroom management software installed in the computers to monitor the student's activities including a list of the students.

Teacher in charge - There will be a Head of ICT teacher who will be in charge of the facility as well as act as liaison between the school and the partners.

Digital Literacy Champions – The schools will be expected to nominate 2 students per class as champions whose responsibility will be to assist the teachers before, during and after the lesson in maintaining order.

This is meant to bring out a sense of responsibility on the students to take good care of the equipment. The head teacher will be required to analyze the school academic performance on a termly basis per class per subject and submit to the Club.

The teachers will have training on how to carry out M&E so that they will be able to do it on their own. They shall send reports periodically which we can review and offer guidance where necessary

## Budget

### **Will you purchase budget items from local vendors?**

Yes

#### **Explain the process you used to select vendors.**

As we have already implemented 7 labs in the recent past, we have created a database of the vendors who were the most competitive in both pricing as well as service delivery. For purposes of creating the budget for the DLP we asked these verified vendors to provide indicative prices for the setup of DLP labs in the five different schools. The most competitive bids were selected.

### **Did you use competitive bidding to select vendors?**

Yes

### **Please provide an operations and maintenance plan for the equipment or materials you anticipate purchasing for this project. This plan should include who will operate and maintain the equipment and how they will be trained.**

The teachers and students will be trained on the day to day maintenance of the equipment. On the technical maintenance, CFSK will ensure that they perform routine visits.

On call support will also be provided by CFSK.

### **Describe how community members will maintain the equipment after grant-funded activities conclude. Will replacement parts be available?**

CFSK , the main implementing partner will ensure the continuous maintenance of the digital labs at agreed terms.

Replacement parts will be locally available

### **If the grant will be used to purchase any equipment, will the equipment be culturally appropriate and conform to the community's technology standards?**

Yes

#### **Please explain.**

We opted on getting desktops which are sturdy, easy to maintain and repair and are locally available making them suitable for the long term

The local organization we are partnering with CFSK ,has worked with several learning institutions in the country in setting up digital labs, will provide the mentioned computers and content that conform to the schools technology standards and also approved by the Kenya Institute of Curriculum Development.

### **After the project is completed, who will own the items purchased by grant funds? No items may be owned by a Rotary district, club, or member.**

The items purchased by the grant funds will be owned by the beneficiary institutions.

## Funding

### **Does your project involve microcredit activities?**

### **Have you found a local funding source to sustain project outcomes for the long term?**

Yes

**Please describe this funding source.**

The school management, supported by the Board of Management have undertaken to set aside a kitty to sustain the project for the long term.

**Will any part of the project generate income for ongoing project funding? If yes, please explain.**

No
